WAIVER: Connersville Utilities will not be responsible for any damage incurred at the time of a water connect due to faulty plumbing or water valves being left open. We acknowledge this and waive all rights to hold the Connersville Utilities liable in circumstances when water service is connected. As a precaution measure, after your water is turned on and prior to using your water, please let the water run for approximately ten minutes. This will clear all air and discolored water in your plumbing lines.
